[New MFA Program](#)

After forty years of experience with art education at the undergraduate level, The Marchutz School of Fine Arts is pleased to introduce its unique MFA degree program that combines the liberal arts, studio practice, and field studies.

The Marchutz School of Fine Arts graduate program is one in which a sustained effort in front of the visible world, a desire to compare and contrast the art of multiple generations and cultures, and a patient faith in one's own imagination can be supported and nourished. The apprenticeship model enhances the artists' relationships to works of all generations in such a fashion that their contemporary work, regardless of style or medium, may coincide with the art of the past while simultaneously revealing the uniqueness of identity, time and place. At The Marchutz School of Fine Arts, such a linkage eventually yields a more powerful expression of significant meaning and a more comprehensive sense of belonging in the world.

Stay tuned for upcoming announcements on the addition of several more masters-level program options at IAU College. Also, please check out the new Marchutz school alumni website at www.themarchutzschool.com & subscribe.
